

12U structure

Description

This 12U structure is a kind of standard CubeSat structure based on modular concept design. It uses the standard U (the envelope of 1U is $10 \text{cm} \times 10 \text{cm} \times 10 \text{cm}$) as the unit and can provide $1 \text{U} \sim 12 \text{U}$ structure at present. It could install various types of CubeSat subsystems and has strong adaptability to the platform

Highlight

- . Stainless Steel Threaded inserts
- . Modular Design
- . Custom internal and external mounting interface
- . The Structure Rails are hard anodized black
- . Possibility of coating in other colors
- . Design Customization on request

TECHNICAL SPECIFICATION

General Characteristics	
Dimensions	250x250x400 mm
Material	Aluminum 7075
Primary Structure Mass	2900 gr
Secondary Structure	Custom Design
Kill Switch	1 – custom Design
Stack mounting	Longitudinal (Z), Lateral (X, Y)
Stack Height/Length	Custom
Stack Layout	PC104

Model
